Sentinelle Medical Launches Aegis with BRIGHT® 2.0 at RSNA

Toronto, Canada: November 26, 2008 – Sentinelle Medical Inc., a leading manufacturer of breast MRI coils and software, will be demonstrating Aegis with BRIGHT® 2.0 at this year's Radiological Society of North America (RSNA) annual meeting in Chicago, Nov. 30 - Dec. 5, 2008 (Booth 6259, Hall A).

Built on Sentinelle's advanced 3D framework, Aegis with BRIGHT offers an exceptionally user friendly graphical interface for analyzing breast MR images and guiding interventional procedures.

Advanced features include Thin Client option, time enhancement curves for better understanding of pixel intensity changes and advanced motion correction.

Designed to simplify biopsy and localization procedures, the system is highly intuitive, easy to use and adaptable to the needs of clinical practices. With immediate and direct access to MR images, Aegis with BRIGHT computes targeted information quickly and accurately, enabling faster throughput and streamlined workflows.

"Aegis with Bright 2.0 is an extremely powerful and efficient tool for diagnosis and interventional planning", said Dr. Marcus John Dill-Macky, Radiology Limited. "The very fast motion correction feature provides improved image quality, greatly increasing my confidence when reviewing cases."

"Sentinelle is dedicated to developing technology to aid in the early detection of cancer." said Cameron Piron, Sentinelle's President and CEO. "Radiologists confront an overwhelming challenge: how to ensure the very best disease management for each patient. Aegis with BRIGHT was developed to improve patient care and ultimately, to contribute to better health outcomes and well-being."

Sentinelle coils and Aegis with BRIGHT together provide an effective integrated hardware-software solution for breast MR imaging and intervention.

About Sentinelle Medical Inc.

Sentinelle Medical is dedicated to improving patient care with early detection and accurate intervention. The company researches, develops, manufactures, sells and supports leading edge Magnetic Resonance Imaging (MRI) technologies. The ground breaking Sentinelle Vanguard® G-S- and T-Series coils provide excellent quality MR images, complete and open access for intervention and award winning design that optimizes patient comfort and workflow. Sentinelle products are used in leading breast cancer and imaging sites throughout North America including Dartmouth-Hitchcock Medical Centre, H. Lee Moffitt Cancer Center and Research Institute (University of South Florida), Mountain Medical Physician Specialists, Radiology Ltd., Scripps Memorial Hospital, Sunnybrook Health Sciences Centre, University Health Network and Windsong Radiology Group. Sentinelle Medical is a privately owned Canadian company.
